WARSPEKE'S PROSPECT

LEAGUES OF VOTANN | WARHAMMER 40,000 | 11TH EDITION

Kâhl Warspeke leads a hardy prospecting expedition of the Leagues of Votann, its Hearthkyn Warriors and swift Hernkyn Pioneers securing claim to a resource-rich prospect while Cthonian Berserks tunnel and smash through all resistance. Ever pragmatic, the Kin balance aggressive expansion against the need to fortify what they have already claimed.

ARMY RULES

PRIORITISED EFFICIENCY

Leagues of Votann units from your army have one of two abilities: Hostile Acquisition or Fortify Takeover. During the battle, which ability those units have changes depending on how many Yield Points (YP) you currently have: at the start of the battle, your units have Hostile Acquisition until the start of your next Command phase; at the end of your Command phase, if you have fewer than 7YP, your units have Hostile Acquisition until the start of your next Command phase; if you have 7YP or more, your units have Fortify Takeover instead.

Hostile Acquisition — Each time a model in this unit makes an attack that targets an enemy unit within range of one or more objective markers, add 1 to the Hit roll. You can re-roll Advance and Charge rolls made for this unit.

Fortify Takeover — Each time a model in this unit makes an attack that targets an enemy unit, if this unit is within range of one or more objective markers you control, add 1 to the Hit roll. Each time an attack targets this unit, if the Strength characteristic of that attack is greater than this unit's Toughness characteristic and this unit is not a Vehicle, subtract 1 from the Wound roll.

Yield Points — At the end of each player's Command phase, you gain 1YP if you control one or more objective markers within your deployment zone, and, from the second battle round onwards, you gain 1 additional YP for each of the following you satisfy: you control one or more objective markers not within your deployment zone; you control two or more objective markers not within your deployment zone; you control more objective markers than your opponent.

Guerrilla Adepts — In your Shooting phase, just after a unit with this ability is selected to shoot, that unit can use this ability. If it does, select one enemy unit (excluding Monsters and Vehicles). Until the end of the phase, attacks made by models in this unit can only target that enemy unit (if it is an eligible target) and, if one or more of those attacks hit, until the start of your next Shooting phase that enemy unit is assailed. If that unit is already assailed, it is also pinned. While a unit is pinned, subtract 2" from its Move characteristic and subtract 2 from Charge rolls made for it.

DETACHMENT RULE

WARSPEKE'S PROSPECT
