ABILITIES

Mobile Arsenal

In your Shooting phase, this unit's ranged attacks can re-roll hit rolls of 1.

Big Booms

In your Shooting phase, just after selecting a target for this model's Supa-kannon, roll one D6 for the target unit and every other unit within 3" of that unit: on a 5+, the unit being rolled for is struck by a concussive wave. After this model has finished making its attacks against that target unit this phase, each unit struck by a concussive wave this phase suffers D3 mortal wounds.

Faction — Waaagh!

Friendly Orks with this ability can re-roll advance rolls, and can become riled up (see Army Rule).

Designer's Note — Legendary Proxy

Kannonwagon was a 10e Legends datasheet removed from BSData entirely in the Sept 2026 Ork codex refresh. GW's own Legendary Proxies list assigns it to count as Gunwagon. This card uses the Gunwagon chassis but keeps Kannonwagon's own signature Supa-kannon gun (current BSData weapon profile — Squiggoth's transport rules still reference this weapon, confirming it's still live data even though no current datasheet equips it by default) and its Big Booms concussive-wave ability verbatim, plus the historically narrower 6-model transport capacity (current Gunwagon holds 12) to preserve the unit's original bigger-gun-smaller-hold niche. Revert to a real datasheet if GW reinstates one.
