A walking firebase. The shoulder-mounted Anvilus autocannons cycle in linked-firing pairs; the dorsal Aiolos missile rack ranges blind targets through chassis-cogitator triangulation; the chest heavy bolter sweeps the close approach.

MELEE WEAPONS

Vestigial — a powered crusher claw retained for the rare moment a Deredeo is forced into close quarters. The chassis is not built to dance.

ABILITIES

Core

Deadly Demise D3

Greater Atomantic Deflector

A reinforced atomantic field tuned for sustained barrage. This model has a 5+ invulnerable save, and a 4+ invulnerable save against ranged attacks.

Anti-Air Targeting Cogitator

Each time this model makes a ranged attack that targets a unit with the **Fly** keyword, re-roll a Hit roll of 1, and improve the Armour Penetration characteristic of that attack by 1 (e.g. AP -1 becomes AP -2).

Linked Cogitator Array

Each time this model is selected to shoot, if two or more of its ranged weapons target the same enemy unit, until the end of the phase those weapons gain the [SUSTAINED HITS 1] ability if they do not already have it, and weapons that already have [SUSTAINED HITS 1] gain [SUSTAINED HITS 2] instead.

Implacable Advance

This model automatically passes Battle-shock tests.

Explodes (5+)

When this model is destroyed, roll one D6 before removing it from play; on a 5+ each unit within 6" suffers D3 mortal wounds.

Designer's Note

Homebrew — 1st Ed (Rogue Trader, 1987) lineage. The Deredeo Class Attack Support pattern fulfills the fire-support role of the original *Rogue Trader* Space Marine Dreadnought — specifically the four-arm "Mortis" loadout, which mounted twin autocannons or twin missile launchers in dorsal and shoulder hardpoints to deliver concentrated indirect fire. The canonical Deredeo (Heresy-era / 7th Ed onward) is GW's modern realisation of that role; this homebrew build dials its three ranged systems into a single linked-cogitator pattern that rewards picking one target and stripping it. The chassis is the slowest Dreadnought in the line (M5"), which is the cost of carrying this much ordnance. Statline anchored on a Redemptor-equivalent base with +2 wounds to reflect the heavier armour plates needed to support a firebase loadout. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
