

IMPERIAL GUARD COMMAND SQUAD

THE OFFICER AND HIS RETINUE

ASTRA MILITARUM • GENERIC REGIMENT • IMPERIUM

Every Officer worth his rank keeps a handful of veterans close — a standard-bearer to hold the line's nerve, a vox-operator to relay commands faster than any runner, a medic to keep him upright when it matters most.

ABILITIES

Faction — Voice of Command

See Army Rule.

Cadre Standing

While this unit contains the Commander model and is within range of an objective marker, this unit can re-roll Battle-shock tests.

Regimental Standard (if taken)

While a model with a Regimental Standard is part of this unit, each time a friendly Regiment unit within 6" of this unit would take a Battle-shock test, it automatically passes.

Master Vox (if taken)

While a model with a Master Vox is part of this unit, Orders issued by an Officer to this unit, or by an Officer within this unit to another unit, can target friendly Regiment units within 12" instead of 6".

Medi-pack (if taken)

While a model with a Medi-pack is part of this unit, models in this unit have the Feel No Pain 5+ ability.

LEADER (OFFICER SWAP)

The Commander model can be replaced with a single named Astra Militarum Officer Character at their own full points cost, wargear, and abilities (e.g. Captain Al'Rahem — see Captain Al'Rahem reference). When you do, the unit's cost becomes 35 points (the 4 Veteran Guardsmen only) plus the named Character's own points. The named Character occupies the Commander's role in this unit and issues Orders per their own datasheet (or this unit's Orders ability, whichever is more generous). Only one Officer may occupy this slot.

UNIT COMPOSITION

1 Commander model; 4 Veteran Guardsman models. The Commander is equipped with: 1 Laspistol; 1 Chainsword. Every Veteran Guardsman is equipped with: 1 Lasgun; 1 Close Combat Weapon. Up to one Veteran Guardsman can be equipped with a Regimental Standard, Master Vox, or Medi-pack instead of a Lasgun (no duplicates).

Designer's Note. Regiment-agnostic core unit — per-regiment flavour belongs in each Combat Patrol's own Detachment Rule, Army Rule, and Enhancements, not in this datasheet. Converted from the 7th Edition-sourced homebrew Infantry Platoon (v3)'s Platoon Command Section. 11th-edition conversion, 2026-07-28: split out of the old combined-unit "Infantry Platoon" system into its own standalone datasheet, matching how current BSData already treats Cadian/Catachan/Krieg Command Squads as separate units rather than sub-squads of one Platoon.
