

IMPERIAL GUARD SQUAD

THE BACKBONE OF THE IMPERIAL GUARD

ASTRA MILITARUM • GENERIC REGIMENT • IMPERIUM • BATTLELINE

Ten men, ten lasguns, one Sergeant to keep them pointed the right way. From Cadia's drilled regiments to the dust-line of Tallarn, this is how the Imperial Guard fights.

ABILITIES

Faction — Voice of Command

See Army Rule.

Hold the Line

At the end of your Command phase, if this unit is within range of an objective marker you control, that objective marker remains under your control, even if you have no models within range of it, until your opponent controls it at the start or end of any turn.

UNIT COMPOSITION

1 Sergeant model; 9 Guardsman models. The Sergeant is equipped with: 1 Laspistol; 1 Chainsword. Every Guardsman is equipped with: 1 Lasgun; 1 Close Combat Weapon. Up to one Guardsman can replace their Lasgun with a Flamer, Grenade Launcher, Meltagun, or Plasma Gun. Up to two Guardsmen can be replaced by a Heavy Weapon Team (Autocannon, Lascannon, or Missile Launcher).

Designer's Note. Regiment-agnostic core unit — per-regiment flavour belongs in each Combat Patrol's own Detachment Rule, Army Rule, and Enhancements, not in this datasheet. Converted from the 7th Edition-sourced homebrew Infantry Platoon (v3)'s Infantry Squad sub-squad. 11th-edition conversion, 2026-07-28: split out of the

old combined-unit "Infantry Platoon" system into its own standalone datasheet, matching how current BSData already treats Cadian/Catachan/Krieg Shock Troops as separate units.
