DETACHMENT

LEGION OF THE DAMNED

SPACE MARINES | WARHAMMER 40,000 | 11TH EDITION

The Legion of the Damned is a chapter no Imperial savant can locate, recruit, or even reliably name. Its Astartes appear bone-white, black-armoured, sigil-marked in cold flame; they fight beside Imperial forces at the moment of greatest need, then fade as though they were never there. This is a fully homebrew Detachment restoring the chapter's lost Chapter-level identity — absorbed into Imperium Agents in 10e as the Damned Legionnaires datasheet, but without detachment rules of its own. Formatted to match the No Figure Left Behind Combat Patrol archive.

FACTION ABILITY

OATH OF MOMENT

At the start of your first Command phase, select one enemy unit. Until that unit is destroyed (or until the end of the battle), each time a model in your army makes an attack against that unit, you can re-roll a Hit roll of 1, and re-roll a Wound roll of 1. The Damned Legionnaires bear no chapter oath but the oath taken at the moment of their summoning — whatever foe their unbidden manifestation has come to destroy.

DETACHMENT RULE

PHANTASMAL ASTARTES

Detachment Points: To use this detachment you must spend 1 DP.

The Damned are not entirely real. Their armour shrugs off attacks as though the Emperor Himself stood between them and the foe — and they remember those who have killed their brothers.

- Friendly Legion of the Damned Infantry units have the [FEEL NO PAIN 5+] ability against all attacks.
- All other friendly Legion of the Damned units (Vehicles, Walkers, Mounted) have the [FEEL NO PAIN 6+] ability against all attacks.
- Each time a friendly Legion of the Damned unit makes an attack against an enemy unit that destroyed any friendly Legion of the Damned Infantry model earlier this battle, that attack has the [DEVASTATING WOUNDS] ability.

FORCE DISPOSITIONS

This detachment has access to the following Force Disposition: Take and Hold.

DETACHMENT COMPOSITION

Included: The Legion of the Damned chapter manifests its host wholesale — every unit in this detachment is Legion of the Damned. All canonical 11e Space Marines and Adeptus Astartes units may be taken (Battleline, Infantry, Vehicles, Walkers, Transports, Dreadnoughts, etc.); every unit gains the LEGION OF THE DAMNED keyword for all rules purposes. Canonical 11e Damned Legionnaires (Imperium Agents codex) and homebrew Sergeant Centurius are the iconic centrepiece units but no longer the only ones that benefit from the detachment rule. Generic Space Marines characters (Captain, Lieutenant, Librarian, Chaplain, Apothecary, Ancient, Techmarine, etc.) are all permitted.

Excluded: Other named Space Marines characters (Calgar, Dante, Azrael, Sicarius, Tigurius, etc. — the Damned march under no other commander). Non-Astartes Imperial allies. Chaos / Tyranid / Necron / Eldar units.

ENHANCEMENTS

SACRED FLAME — *Character model only*

The bearer's weapons crackle with white spectral fire that has no fuel save the foe's screams. Weapons equipped by the bearer have the [DEVASTATING WOUNDS] ability. In addition, the bearer has a 5+ Feel No Pain against Mortal Wounds.

BURNING SKULL — *Character model only*

The bearer's helmet is a death-mask of bone-white flame, and the foe's eye instinctively turns away from it. Once per battle, in any phase other than your opponent's Charge phase, the bearer can manifest a Phantasmal Veil. Until the start of your next Command phase, all friendly Legion of the Damned units (and the bearer's own unit) within 9" of the bearer have the Stealth ability AND attacks targeting them suffer -1 to the Wound roll.

VENGEANCE CODIFIED — *Character model only*

The bearer keeps a private ledger of foes who have killed her brothers. The ledger has only one column. Each time a friendly Legion of the Damned unit is destroyed during the battle, the bearer permanently gains +1 Attack with all of their melee weapons (cumulative, no upper limit) AND a 5+ Feel No Pain against ranged attacks until the start of your next Command phase.

PHANTASMAL REACH — *Legion of the Damned Infantry unit only*

The bearer arrives where the Emperor wills, not where the cartographer permits. During deployment, place the bearer (and the Infantry unit they are leading, if any) in Strategic Reserves. From battle round 1, this unit can arrive: set up wholly within 6" of any battlefield edge OR wholly within 6" of a friendly Legion of the Damned Infantry unit already on the battlefield, and more than 3" from any enemy unit (instead of the standard 9").

DESIGNER'S NOTE

Homebrew — 2nd Ed Chapter (1990), 11e conversion. The Legion of the Damned first appeared in 2nd Ed Codex: Ultramarines & Imperium as the mysterious unbidden chapter that aids Imperial forces in their direst hour. They had distinct Chapter rules through 7th Ed Codex: Space Marines, were absorbed into Imperium Agents in 10e as the Damned Legionnaires datasheet, but lost their Chapter-level identity (no detachment rule, no chapter-specific stratagems) — and remain in that state in 11e, still with no official detachment. This homebrew detachment restores that identity as a wholesale subfaction, reformatted 2026-08-31 to the current 11e Detachment framework (Detachment Points, Force Dispositions) from an earlier 10e-format draft; content (Phantasmal Astartes, the four Enhancements, all six Stratagems) is unchanged from that draft, since the 10e→11e format update didn't require any rules content to change.
