ABILITIES

The Hydra's Spite
[ASSAULT] [ANTI-VEHICLE 4+]

The Pale Spear
[ANTI-VEHICLE 3+]. Each time an attack is made with this weapon, a Critical Hit is scored on an unmodified Hit roll of 5+ (instead of 6+). Each time this weapon damages a unit, until the end of the battle, worsen the Strength characteristic of models in that unit by 1, to a minimum of 1.

Everywhere and Nowhere
At the start of the battle, after both players have finished deploying their armies, this model can be removed from the battlefield and set up again, attached to a different eligible unit (including one that is embarked within a Transport), following the normal rules for a Character joining a unit.

Sire of the Alpha Legion [AURA]
Once per battle, when a friendly Alpha Legion unit is set up on the battlefield using Strategic Reserves, you can set it up wholly within 6" of any battlefield edge and more than 9" from all enemy models, instead of following the normal Strategic Reserves rules.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

UNIT COMPOSITION

> **Designer's Note.** Built directly from the real HH3e digitized "Alpharius" profile (`Alpha Legion.json`). Real stat line: M8/WS7/BS7/S6/T6/W6/I7/A6/LD12/CL10/WP10/IN11/SAV2+/INV4+, Type Paragon (Unique, Light), 465pts (HH3e economy) — a real cost coincidentally identical to Guilliman's, Ferrus Manus's, and Vulkan's real 465pts. His real T6 sits in the standard baseline Primarch group (matching Guilliman's own group), so this card reuses Guilliman's translation outright: 360pts, standard T9/W10. Real IN11 is the highest Intelligence of any Primarch checked in this project, matching his fluff as the Legion's master of cunning. The real digitized profile is simply named "Alpharius" with no separate "Omegon" entry — the source data does not attempt to mechanically resolve which twin is which, mirroring the real Legion's own defining ambiguity. The Hydra's Spite is his real fixed signature plasma pistol (real Breaching(4+), translated to Anti-vehicle 4+). The Pale Spear is his real signature power weapon (real Critical Hit(5+), the established elevated-Crit rendering; real Armourbane, translated to Anti-vehicle 3+; real Phage(S), a

> genuinely distinctive rule that permanently weakens a wounded unit's Strength for the rest of the battle, translated directly). Everywhere and Nowhere is real and translated directly — his real rule allows him to be redeployed to a different unit at the start of the battle, a fitting mechanical nod to the Legion's doctrine of concealed identity: no opponent can be certain which unit he started the battle attached to. Sire of the Alpha Legion is real; its actual text is a Force-Organisation Prime-Slots clause (unbuildable in 11e, omitted) plus a genuine Reserve-Roll-based Outflank grant for Alpha Legion units, translated as a once-per-battle Strategic Reserves deployment upgrade. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
