HOMEBREW — HH-ERA (30K) — WORLD EATERS ONLY

ANGRON TRANSFIGURED

330 POINTS

THE RED ANGEL, ASCENDED

LEGIONES ASTARTES • WORLD EATERS • TRAITOR

At Skalathrax, Angron's soul finally burned away entirely, and what rose from the pyre was no longer a Primarch fighting his own mind — only the Nails, given wings, given a throne of skulls, and given nothing left to lose.

ABILITIES

Blades of the Red Angel — Crushing Blows
[DEVASTATING WOUNDS]. Each time this weapon is allocated against a Vehicle or Monster, worsen the target's invulnerable save characteristic by 1 (to a minimum of 6+) for that attack.

Blades of the Red Angel — Eviscerating Slashes
Each time an attack made with this weapon destroys the model it targeted, if that model was part of a unit that has one or more models remaining, you can allocate 1 mortal wound to that unit.

Core
[FIGHTS FIRST] [DEEP STRIKE]

Fear
Each time an enemy unit within 6" of this model takes a Battle-shock test, that test is taken with a -2 modifier.

Butcher's Nails
Each time this model makes a melee attack, a Critical Hit is scored on an unmodified Hit roll of 5+.

Slaughterer of the Red Sands
Each time this model destroys an enemy unit, until the end of the battle, add 1 to the Attacks characteristic of this model's melee weapons (this can apply more than once).

Unfettered Rage
This model is eligible to declare a charge in a turn in which it Advanced.

Lord of Corruption
You cannot include this model in the same army as Angron.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

> **Designer's Note.** This is Angron in the immediate aftermath of Skalathrax — daemon-ascended, but still a 30K-era daemon, not the 10,000-year-old, fully-cooled Daemon Primarch of the current 40K Chaos codex. Built directly from the real HH3e "Angron Transfigured" profile once our local BSData was refreshed: 600pts in HH3e's own economy, only 1.33x mortal Angron's 450pts — a moderate jump, not a different power category, which is exactly the "jacked-up 30K Primarch rather than current-40K daemon" read the profile calls for. Applied that same 1.33x ratio to our 11e mortal Angron (350pts) to land at 460pts here, rather than anchoring on the current 40K Daemon Angron datasheet (330pts) — that datasheet reflects ten millennia of separate Chaos-codex power creep and

simply isn't the right comparison point for a freshly-ascended 30K daemon. Stat and weapon translation follows the real data directly: M14"/T11/W12/OC5 (scaled up from mortal's M8"/T9/W10/OC4 using the same ratio the real d10 profile shows between mortal Angron and Transfigured Angron), FLY and no ranged weapon (the real profile carries no gun at all — Transfigured Angron doesn't shoot, he just closes and kills), and two Blades of the Red Angel profiles (Crushing Blows: real Critical Hit(6+)+Armourbane, translated to Devastating Wounds + an invuln-worsening effect; Eviscerating Slashes: real Reaping Blow(2), translated to a cleave-onto-the-unit mortal wound on kill). Sire of the World Eaters and Lord of the Red Sands are deliberately absent — the real data doesn't carry either onto this profile, and thematically a fully-ascended daemon has stopped leading his Legion tactically and simply kills; Slaughterer of the Red Sands is a new signature ability filling that gap, an escalating-bloodlust mechanic rather than a command aura. Lord of Corruption (cannot be fielded alongside mortal Angron) is a real, directly-portable rule — you're building one Legion, one Angron, pre- or post-Skalathrax, not both at once. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
