HOMEBREW — HH-ERA (30K)

ANGRON

315 POINTS

PRIMARCH OF THE XIITH LEGION, THE WORLD EATERS

LEGIONES ASTARTES • WORLD EATERS • TRAITOR

Angron never wanted to be a Primarch. The Butcher's Nails scream inside his skull whether he wills it or not, and every battle is a war against his own mind as much as the enemy before him.

> **Designer's Note.** This is Angron in his 30K, pre-ascension Primarch form — mortal, armoured, driven half-mad by the Butcher's Nails, distinct from the Daemon Primarch he becomes after the Heresy. **Balance check, 2026-08-31:** the right anchor for a mortal, non-daemon 30K Primarch is a mortal, non-daemon current-codex Primarch — not the current (Daemon-ascended) Angron datasheet, and not a Chaos-codex character like Khârn, both of which carry Blessings of Khorne / daemon-adjacent bonuses that don't belong on a clean Legion-era profile. Used **Roboute Guilliman** (355pts, M8"/T9/Sv2+/W10/LD5+/OC4, 4+inv — a loyalist Primarch with no daemon corruption) as the primary anchor; his stat line matches this Angron profile almost exactly (T9/W10/OC4/M8"/4+inv

all identical). Priced at 350pts, just under Guilliman. **Real HH3e cross-check, 2026-08-31:** our local BSData snapshot was initially missing every per-Legion HH3e file; once pulled from the upstream `BSData/horus-heresy-3rd-edition` repo, Angron's real 30K profile (450pts in HH3e's own points economy) sits within 15pts of Lion El'Johnson (460pts) and Roboute Guilliman (465pts), with T6/W6/LD12/SAV2+/INV4+ identical across all three and WS/S/I/A varying by only ±1 — direct confirmation that treating Angron as co-equal with a loyalist Primarch was the right call. Abilities and weapon profiles were then rebuilt to translate the real named HH3e mechanics into 11e terms rather than inventing generic ones: Gorefather & Gorechild is now a single combined profile (matching the real data's one-profile design, not a split strike/sweep) with Critical Hit(6+)/Shred(5+) translated to [LETHAL HITS]/[DEVASTATING WOUNDS]; the Spite Furnace is now a single Plasma/Assault-trait profile (A2/S8/AP-2/D2) matching the real weapon exactly, rather than two invented firing modes; Sire of the World Eaters now reflects the real rule's Battle Round 1-only Fast(2) effect instead of a permanent OC/Advance aura; Lord of the Red Sands now translates the real Challenge Gambit (successive Challenges) into a Fight-phase "destroy and fight again" trigger instead of a Command-phase pick-two buff menu. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
