Designer's Note. Built from the real HH3e digitized "Atramentar Flay-clade" profile (`Night Lords.json`) — the VIII Legion's Terminator honour guard, the unit Sevatar himself commands. Real stat line: Atramentar Trucidor (Sergeant) M7/WS4/BS4/S4/T5/W2/I4/A3/LD8/SAV2+/INV5+, Atramentar the same but A2, both 35pts/model plus a 30pts unit fee (HH3e economy), 5-20 models. Priced at 150/300pts for 5/10, using this project's established ~0.87 squad ratio. Nostraman chainglaive is real and canonically named — the source data explicitly renames the generic Chainglaive entry to "Nostraman chainglaive" specifically for this unit (real Breaching(6+)/Shred(6+), folded into a single Devastating Wounds, matching the Contekar Terminator Squad's chainblade rendering). Combi-bolter is real; Implacable Advance and Impact(I) are both real, the latter using the same flat Strength-on-charge rendering established for the Night Raptor Squad. Cloaked in Murder is a real, distinctively worded rule — in the source it grants a Set-up Move bonus when charging a Unit already Locked in Combat; translated here as a Charge-roll

bonus against a target already Within Engagement Range of a friendly unit, preserving the "finishing off a fight already in progress" fantasy in 11e's terms. Sworn Loyalty (Sevatar's Leadership-sharing aura for this unit) is deliberately not duplicated here; it's already fully documented on Sevatar's own card. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
