Bolter
[RAPID FIRE 1]

UNIT COMPOSITION

1-3 models. Each model is equipped with a Bolter and Shock chargers.

Keywords: VEHICLE, WALKER, CASTELLAX BATTLE MANIPLE

Faction Keywords: LEGIONES ASTARTES, IRON HANDS

> **Designer's Note.** Built directly from the real HH3e digitized "Castellax Battle Maniple" profile (`Iron Hands.json`, shared Cybernetica automata data), a Heavy Assault choice, 50pts real per model, translated using the standard ~0.87 squad ratio to 44pts per model. Real stat line: M6/WS3/BS3/S6/T6/W4/I3/A2/LD7/CL12/WP4/IN4/SAV3+/INV6+ — real CL12 (Cool) is the maximum possible value, reflecting a mindless automaton immune to fear. Real "Implacable Advance" (all non-Heavy ranged weapons count as Assault) and real "Phased Refractor Shields" (improved invulnerable save specifically against Shooting Attacks) are both translated directly. The real squad size range (kept as 1-3 rather than the standard 5/10 pattern, matching how other unusual-range units have been handled this session) reflects the real "maniple" unit-of-automata convention shared across Legion books. Default loadout (Bolter, Shock chargers) is real; the real Pair of power blades melee upgrade is omitted for card brevity. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
