> **Designer's Note.** Built directly from the real HH3e digitized "Castellax Destructor Maniple" profile (`Iron Hands.json`, shared Cybernetica automata data), a Heavy Assault choice, 50pts real per model, translated using the standard ~0.87 squad ratio to 44pts per model, using the same base Castellax chassis as the Battle Maniple variant (real M6/WS3/BS3/S6/T6/W4/I3/A2/LD7/CL12/WP4/IN4/SAV3+/INV6+, real Implacable Advance and Phased Refractor Shields both translated the same way). The Mauler bolt cannon is this variant's real signature ranged weapon (real Shred(5+), translated to a Wound re-roll; real Pinning(0), translated to a Battle-shock trigger), differentiating it from the Battle Maniple's default Bolter loadout. The real squad size range is kept as 1-3, matching the Battle Maniple's own real "maniple" unit-of-automata convention. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
