5 MODELS (FIXED)

THE ORDER'S TERMINATOR RETINUE

LEGIONES ASTARTES • DARK ANGELS • LOYALIST

Five, always five — the Deathwing does not field a retinue any other size. Where they stand, no sniper's mark ever finds the officer they've sworn to keep breathing.

Implacable Advance
This unit cannot be selected to make a Fall Back move, and ignores modifiers to its Movement characteristic.

Companions
Each time a friendly Dark Angels Character model is leading this unit, ranged attacks made against this unit cannot use the [PRECISION] ability to target that Character model.

UNIT COMPOSITION

5 models: 1 Cataphractii Oathbearer (Sergeant) and 4 Cataphractii Companions, in Cataphractii Terminator armour. All models are equipped with a Combi-Bolter and a Calibanite Warblade. Up to 1 model can replace its Combi-Bolter and Calibanite Warblade with paired Lightning Claws. The Oathbearer can replace its Calibanite Warblade with a Terranic Greatsword.

Designer's Note. Built from the real HH3e digitized "Cataphractii Terminator Deathwing Companions" profile (`Dark Angels.json`, filed as a Retinue). Real stat line: Companion M6/WS5/BS4/S4/T5/W2/I4/A3/LD8, Oathbearer (Sergeant) the same but LD9, both SAV2+/INV4+ — translated onto the established Saturnine-chassis Terminator anchor (M5"/T5/Sv2+/W3, 4+inv). Genuinely distinct from every other Terminator unit built so far in this project: the real profile is a **fixed 5-model unit** (4 Companions + 1 Oathbearer, no 10-model scaling option at all) —

> preserved as-is here rather than inventing a 10-model variant, reflecting the Deathwing's real tabletop tradition of 5-man squads. 235pts flat, close to Deathshroud's 5-model price (230pts). Calibanite Warblade and Terranic Greatsword are both real and canonically named (real Breaching(5+) on both, translated to Anti-vehicle 5+). Companions is a real, distinctive named rule — it protects an attached Character from Precision shooting attacks specifically, translated directly rather than generalized into a flat defensive bonus. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
