HOMEBREW — HH-ERA (30K)

CONTEKAR TERMINATOR SQUAD

230 / 440
5 / 10 MODELS

NOSTRAMAN DEEP-COVER CATAPHRACTS

LEGIONES ASTARTES • NIGHT LORDS • TRAITOR

They do not breach a position so much as arrive inside it, and by the time anyone realizes the walls have already fallen it is far too late to matter.

Designer's Note. Built from the real HH3e digitized "Contekar Terminator Squad" profile (`Night Lords.json`) — Terminator-armoured infiltration specialists, the Legion's answer to a stealth-and-breach role most other Legions solve with plain assault troops. Real stat line: Dissident (Sergeant) M7/WS5/BS4/S4/T5/W2/I4/A3/LD9/SAV2+/INV5+, Contekar the same but LD8/A3, both 40pts/model plus a 65pts unit fee (HH3e economy), 5-15 models. Priced at 195/370pts for 5/10, using this project's established ~0.87 squad ratio. Volkite Cavitor is real and canonically named (real Deflagrate(6), translated to Devastating Wounds, matching the Volkite Serpenta rendering already used on the Destroyer Squad); Chainblade is real (real Breaching(6+)/Shred(6+), folded into a single Devastating Wounds rather than modelling both separately). The real Escaton power claw upgrade (10pts, Dissident only) is real but left as a composition note rather than a fully modelled option, matching this project's standard trimming of secondary sergeant upgrades. Bulky(2) and Vanguard(3) are both real Victory-Point/deployment-scoring or untranslatable fluff rules with no clean 11e analogue and are left unbuilt; Implacable Advance, Deep Strike, and Fear(1) are all real and translated directly. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons

> S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
