HOMEBREW — HH-ERA (30K)

CONTEMPTOR-INCAENDIUS DREADNOUGHT

175 POINTS

HEAVY ASSAULT

LEGIONES ASTARTES • BLOOD ANGELS • LOYALIST

The old pilots always burn hottest. This one just does it literally now.

ABILITIES

Heavy flamer
[TORRENT]

Paired Talons of Perdition
Each time this weapon damages a unit, until the end of the turn, that unit is Battle-shocked.

Incaendius Boost Pack
Each time this model Advances, it can move across models and terrain features as if they were not there.

UNIT COMPOSITION

1 Contemptor-Incaendius Dreadnought model. Equipped with: 2 Heavy flamer; 1 Paired Talons of Perdition.

Keywords: VEHICLE, WALKER, CONTEMPTOR-INCAENDIUS DREADNOUGHT

Faction Keywords: LEGIONES ASTARTES, BLOOD ANGELS

Designer's Note. Built directly from the real HH3e digitized "Contemptor-Incaendius Dreadnought" profile (`Blood Angels.json`), a Heavy Assault choice, 200pts real cost, translated using the standard ~0.87 squad/war-machine ratio to 175pts. Real stat line: M8/WS4/BS4/S7/T7/W6/I4/A4/LD12/CL10/WP7/IN5/SAV2+/INV5+, Type Walker, real Explodes(4+) and Bulky(7) both omitted as untranslatable fluff/army-composition detail. Paired Talons of Perdition is real and this variant's signature loadout (real Aflame(2), a Leadership-penalty-on-hit rule, translated to a Battle-shock trigger); Two Heavy flamers is the real default ranged loadout, with several heavier alternate weapon options in the source omitted for card brevity. Incaendius Boost Pack is real — the model gains the Antigrav Sub-Type for the Movement Phase when it makes a Rush move — translated as a Move-Through-Cover-style ability on an Advance. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
