CONTEMPTOR-OSIRON DREADNOUGHT

150 POINTS

PSYCHIC-ATTUNED DREADNOUGHT PATTERN

LEGIONES ASTARTES • THOUSAND SONS • TRAITOR

Whatever remains of the man inside an Osiron's sarcophagus, it remembers enough of the Cult Arcana to still cast — a dying mind that never quite finished dying, given a body that never has to stop fighting.

Designer's Note. Built from the real HH3e digitized "Contemptor-Osiron Dreadnought" profile (`Thousand Sons.json`) — a psychic-attuned variant of the shared Contemptor chassis, carrying a Prosperine Arcana of its own. Real stat line: M8/WS4/BS4/S7/T7/W6/I4/A4/LD12/SAV2+/INV5+, 200pts (HH3e economy), translated to the established Contemptor-tier 11e anchor (T10/W9/OC3, matching this project's Excindio Battle-Automata chassis) and priced at 150pts. Gravis Force Blade is real and canonically named (real Force(D)/Reaping Blow(2), translated to Devastating Wounds plus a cleave-on-kill mortal wound). The real profile offers nine ranged weapon swaps (gravis bolt cannon, twin lascannon, gravis autocannon, gravis plasma cannon, conversion beam cannon, twin volkite culverin, Kheres assault cannon, gravis melta cannon, æther-fire magna-cannon) — trimmed to the default plus one representative alternative (Kheres assault cannon) for card space, matching the simplification pattern used for every other multi-option unit in this project. The real selectable Prosperine Arcana/Psychic Disciplines menu was not built as a full power list, for the same reason as Magnus and the named Librarians on this roster; the [PSYKER] keyword marks it as psychically active without inventing specific spells for it. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
