HOMEBREW — HH-ERA (30K) — DARK ANGELS ONLY

CORSWAIN

185 POINTS

LORD OF THE THIRD LEGION FLEET

LEGIONES ASTARTES • DARK ANGELS • LOYALIST

Caliban's oldest knightly oaths still move in his hand when the blade comes out — Corswain fights like a duellist because the Order raised him to be one, long before the Legion ever did.

> **Designer's Note.** Built from the real HH3e digitized "Corswain" profile (`Dark Angels.json`, filed as High Command) — a Lion-loyal Dark Angels commander from the Ruinstorm/Angels of Caliban material. Real stat line: M7/WS7/BS5/S4/T4/W4/I5/A5/LD10/SAV2+/INV4+, 220pts (HH3e economy). Priced at 165pts, scaling Khârn the Bloody's 130pts by the real 220/175 point ratio between the two (both Captain-tier HQs on the same Praetor-anchor chassis). The Blade (his signature sword) is real and canonically named — real Duellist's Edge(2), the same rule Nathaniel Garro carries, translated identically as Fights First vs. Characters. Armour of the Forest (real wargear: reduces Challenge damage by 1, min 1) and The Angels of Death (real Legion-wide mental-resilience

> rule, shared with Lion El'Johnson) are both translated directly. No named ranged weapon exists on the real profile — just a plain Bolt Pistol — kept as-is rather than inventing a relic gun. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
