Designer's Note. Built directly from the real HH3e digitized "Dark Fury Squad" profile (`Raven Guard.json`), an Elites choice, 20pts real per model, translated using the standard ~0.87 squad ratio to 18pts per model (90/180 for 5/10). Real stat line: M14/WS5/BS4/S4/T4/W2/I4/A3/LD8/CL7/WP7/IN7/SAV3+/INV-, Type Infantry (Antigrav) — a real M14 jump-assault chassis and real W2, matching this project's established pattern for elite melee-focused shock troops. The Pair of Raven's Talons is real and this squad's whole identity: real AM+2 folded into a flat A5, real Rending(6+) translated to Lethal Hits, real Breaching(6+) translated to Anti-vehicle 6+, and real Impact(IM) — an unusual variant that boosts Initiative rather than Strength on a successful Charge — translated as a Charge-turn Fights First, the closest 11e analogue to "strikes before anyone else even lands." **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Vanguard Veteran Squad with Jump Packs 105→110.
