Designer's Note. Built directly from the real HH3e digitized "Deliverers Squad" profile (`Raven Guard.json`), an Elites choice, 55pts real per model, translated using the standard ~0.87 squad ratio to 48pts per model (240/480 for 5/10). Real stat line: M6/WS5/BS4/S4/T5/W2/I4/A3/LD9/CL8/WP7/IN7/SAV2+/INV4+, Type Infantry (Heavy), a Terminator-tier chassis — default Power fist loadout kept for card consistency with this project's other Terminator-tier squads, matching the real "Free Power Weapon" wargear category. Corax's Shame is real and genuinely unusual: a unit-level restriction rather than a combat ability, tied to a specific dark chapter of Raven Guard history — the real rule bars this unit from ever being joined by a Corvus Corax model and penalises its Reserves rolls whenever Corax is also held in Reserve. The Reserves-roll penalty was trimmed as a negligible army-building nuance (matching this project's standing convention for minor mechanics), but the joinability restriction was kept as a genuine composition note since it's the whole point of the real rule's name. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
