HOMEBREW — HH-ERA (30K) — DARK ANGELS ONLY

EXCINDIO BATTLE-AUTOMATA

165 POINTS

CALIBAN-PATTERN WAR MACHINE

LEGIONES ASTARTES • DARK ANGELS • LOYALIST

Something in the machine-spirit remembers Caliban's beasts even now — placid until wounded badly enough, and then utterly incapable of telling friend from prey.

DESIGNER'S NOTE. Built from the real HH3e digitized "Excindio Battle-Automata" profile (`Dark Angels.json`) — a Caliban-pattern war machine unique to the Dark Angels, distinct from the shared Mechanicum Castellax/Domitar lines. Real stat line: M7/WS5/BS5/S7/T7/W8/I4/A4/LD10, SAV3+/INV5+, 180pts (HH3e economy) — translated to a walker-tier 11e chassis (T10/W9/Sv3+/OC3, 5+inv). Priced at 165pts. The real profile offers five different weapon options (Excindio Claws, Athanax Phosphex Canister Launcher, Tyrhenius Nerve Induction Shredder, Magaron Atomantic Pulse Cannon, Cytheron Graviton Flux Projector) — simplified here to the two most thematically distinct picks (a rad/phosphex launcher and an anti-armour pulse cannon) alongside the default claws, rather than presenting all five for card-space reasons. Vengeful Rage is a real, genuinely dangerous named rule kept exactly as written: once badly wounded, the automata's machine-spirit loses the ability to distinguish friend from foe and must fire on the nearest unit regardless of allegiance — a real drawback, not softened into a pure buff. **11e codex**

> **update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
