Designer's Note. Built from the real HH3e digitized "Gal Vorbak" profile (`Word Bearers.json`) — "The Dark Brethren", the Legion's mass-produced possessed shock troops, real Type "Infantry (Malefic)". Real stat line: M8/WS5/BS4/S5/T5/W3/I5/A3/LD9/SAV3+ (no invuln, Feel No Pain(5+)), a flat 50pts/model with no separate unit fee (HH3e economy), 5-10 models — the most expensive per-model cost of any generic Troops-tier squad checked in this project so far, matching their elite possessed-warrior fluff. Priced at 220/435pts for 5/10, using this project's established ~0.87 squad ratio. Tainted Talons is real and canonically named (real Breaching(6+)/Shred(6+)/Phage(S), translated to Anti-vehicle 6+, Devastating Wounds, and the established once-per-unit Strength debuff respectively); a Bolter is the real default ranged weapon. Fear(1) and Implacable Advance are both real and translated directly. Vanguard(X) and Bulky(X) are both real Victory-Point-scoring/untranslatable fluff rules and are left unbuilt. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Intercessor Squad 80→85.
