HOMEBREW — HH-ERA (30K) — LOYALIST

GARVIEL LOKEN

150 POINTS

CAPTAIN, TENTH COMPANY

LEGIONES ASTARTES • SONS OF HORUS • LOYALIST

He was Luna Wolf before he was ever Son of Horus, and some part of him never stopped being one. Everyone around him has already chosen a side. Loken is still, quietly, working out which side was ever really his.

Designer's Note. Built directly from the real HH3e digitized "Garviel Loken" profile (`Sons of Horus.json`) — and a genuine surprise in the source data: unlike every other named character in this file, Loken is explicitly tagged Loyalist rather than Traitor, filed in his own Legion's book rather than in Blackshields/Shattered Legions/Knights-Errant. That makes him the standing per-Legion loyalist-holdout check's answer for the Sons of Horus without needing the Garro/Endryd-Haar dual-Faction-Keyword pattern — he's simply a Loyalist option native to this roster, fielded with the Legiones Astartes/Sons of Horus Faction Keywords like everyone else here. Real stat line: M7/WS6/BS5/S4/T4/W4/I5/A5/LD10/SAV2+/INV4+, 175pts (HH3e economy) — translated to 135pts using this Legion's ~0.76 ratio. Paragon Blade is real and canonically named (real Critical Hit(6+), translated to Lethal Hits). Born Survivor is a real, distinctively-worded rule (a 4+ chance to avoid death outright, dropping to 1 wound instead) kept exactly as written. Hatred(X) appears twice in the real data at different points of his career; here it's split the same way Marduk Sedras' Ancient of War was split — a generic always-on version against enemy Characters

(Predator's Focus) plus a Traitor-Faction-gated add-on (The Hound's Vendetta) for when he's fielded specifically as a still-Loyalist holdout facing his former brothers. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
