Designer's Note. Built from the real HH3e digitized "Golden Keshig" profile (`White Scars.json`) — the Khan's own jetbike-mounted honour guard. Real stat line: Keshig Champion (Sergeant) M16/WS5/BS4/S4/T4/W2/I4/A3/LD9/SAV2+ (no invuln), Keshig Rider the same but LD8, both 40pts/model plus a 60pts unit fee (HH3e economy), real Type "Cavalry (Antigrav)" — the fastest real Movement characteristic found on any unit checked in this project so far, and a genuinely unusual squad-size range (2-5 Riders plus 1 mandatory Champion, 3-6 total, rather than the usual 5/10 pattern). Priced at 120/225pts for 3/6, using this project's established ~0.87 squad ratio. Kontos Power Lance is real and canonically named (real IM+4 — the single largest flat Initiative bonus found on any weapon in this project — translated to an unconditional Fights First; real Armourbane, translated to Anti-vehicle 3+; the real weapon's lance-pattern charge bonus, implied by its Cavalry mount and Impact(AP) rule, is rendered as a Wound-roll bonus on the charge turn, matching this project's established Lance-weapon idiom). Scatterbolt Launcher is real (a real Template weapon, translated using this project's standard Template-to-Torrent rendering; real Shred(6+) folded into Devastating Wounds). Deep Strike is real and translated directly; Bulky(3) is untranslatable fluff and omitted. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Sternguard Veteran Squad 100→105.
