Designer's Note. Built directly from the real HH3e digitized "Grey Slayer Pack" profile (`Space Wolves.json`), the Space Wolves' Troops choice, 12pts real per model, translated using the standard ~0.87 squad ratio to 10pts per model (100/200 for 10/20). Real stat line: M7/WS4/BS4/S4/T4/W1/I4/A2/LD7/CL7/WP7/IN7/SAV3+, no invulnerable save — structurally the same "Legion Tactical Squad" archetype seen on every other Legion's roster, given its Space Wolves name here. The Huscarl sergeant's real signature upgrade, a pair of lightning claws (real Rending(6+), translated to Devastating Wounds; real Breaching(6+), translated to Anti-vehicle 6+), is kept as the squad's one distinctive option; the melta bombs sidegrade is omitted for card brevity. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Assault Intercessor Squad 75→85.
