Designer's Note. Built directly from the real HH3e digitized "Honoured Telemechrus" profile (`Ultramarines.json`), 170pts real cost, translated using the standard ~0.87 squad/war-machine ratio to 148pts. Real stat line: M8/WS4/BS4/S7/T7/W6/I4/A4/LD12/CL10/WP7/IN5/SAV2+/INV5+, Type Walker (Unique) — the oldest active Dreadnought in this project's data, matching his real lore as an ancient of the Legion predating even the Great Crusade's later campaigns. His default loadout is real: Kheres assault cannon (real Breaching(6+), translated to Anti-vehicle 6+) and a Gravis power fist. A real alternate Combi-bolter ranged option exists in the source data and is omitted here for card brevity, matching how minor alternate-weapon options have been trimmed for other units this session. No standalone real Special Rule beyond his wargear was found attached to this profile in the source data. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
