HOMEBREW — HH-ERA (30K) — SONS OF HORUS ONLY

HORUS ASCENDED

765 POINTS

THE WARMASTER, EMPOWERED

LEGIONES ASTARTES • SONS OF HORUS • TRAITOR

Molech changed him. He still walks on two feet, still leads his Legion as a general leads an army — but something behind his eyes now answers to four different Gods at once, and it no longer bothers to hide.

ABILITIES

The Warmaster's Talon (Ranged)
[ASSAULT] [ANTI-VEHICLE 6+]

The Warmaster's Talon (Melee)
[DEVASTATING WOUNDS]. Each time an attack made with this weapon destroys the model it targeted, if that model was part of a unit that has one or more models remaining, you can allocate D3 mortal wounds to that unit.

Worldbreaker
[LETHAL HITS]. Each time an attack is made with this weapon, a Critical Hit is scored on an unmodified Hit roll of 5+ (instead of 6+). While this model is equipped with the Worldbreaker, it does not have the [FIGHTS FIRST] ability.

Core
[FIGHTS FIRST] [DEEP STRIKE] [FEEL NO PAIN 5+]

Eternal Warrior
Each time damage is allocated to this model, if that damage exceeds 3, that damage is reduced to 3.

Master of War
At the start of each of your Command phases, if this model is on the battlefield, you gain 1 Command Point.

Aura of Corruption
Each time an enemy unit within 6" of this model takes a Battle-shock test, that test is taken with a -1 modifier.

The Warmaster Ascended
You cannot include this model in the same army as Horus Lupercal.

UNIT COMPOSITION

> **Designer's Note.** This is Horus after Molech — empowered by all four Chaos Gods at once, but still a general leading a Legion, not yet the winged, fully-fallen Daemon Primarch of the current 40K Chaos codex or even the Angron-Transfigured style full ascension. Built directly from the real HH3e "Horus Ascended" profile: 850pts (HH3e economy), 1.60x mortal Horus's 530pts — applied that same ratio to our 11e mortal Horus Lupercal (410pts) to

land at 655pts. Real stat delta from mortal to Ascended is modest and uniform (M unchanged at 8, WS/BS/W/I/A all +1, S/T +2, LD +2) — nothing like Angron's dramatic Transfigured jump to M14"/Fly, and the real data confirms it: no Fly, no altered Movement, just a stronger version of the same general. Translated as a flat T9→T10/W11→W13/OC4→OC5/LD6+→5+ bump over the mortal card, no Fly added. Both weapons carry over unchanged in kind (same named relics, Strength bumped +1 each to reflect the real stat increase). Feel No Pain(5+) and the improved Eternal Warrior(3) (damage cap raised from 2) are both real and directly portable. Fear(1) is real but scaled down from Angron Transfigured's Fear rule (a lower X value in the source), translated as Aura of Corruption at -1 instead of -2. The Warmaster Ascended (cannot be fielded alongside mortal Horus) is a real, directly-portable mutual-exclusion rule, same pattern as Angron Transfigured's Lord of Corruption. Sire of the Sons of Horus is deliberately absent — it does not appear anywhere on the real Ascended profile's upgrade list, the same narrative logic as Angron Transfigured dropping Sire of the World Eaters: an empowered Horus has stopped worrying about tactical Legion buffs. The Spreading Corruption (real rule letting Horus join Malefic-Sub-Type units) is a real rule with no Malefic units built anywhere in this project yet, left unbuilt rather than invented around. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
