PRIMARCH OF THE XVITH LEGION, THE SONS OF HORUS — WARMASTER OF THE GREAT CRUSADE

LEGIONES ASTARTES • SONS OF HORUS • TRAITOR

He was the favoured son, the one the Emperor trusted above all his brothers, and that trust is exactly what he turned into a weapon. Every Legion that follows him still believes, on some level, that he cannot be wrong.

ABILITIES

The Warmaster's Talon (Ranged)
[ASSAULT] [ANTI-VEHICLE 6+]

The Warmaster's Talon (Melee)
[DEVASTATING WOUNDS]. Each time an attack made with this weapon destroys the model it targeted, if that model was part of a unit that has one or more models remaining, you can allocate D3 mortal wounds to that unit.

Worldbreaker
[LETHAL HITS]. Each time an attack is made with this weapon, a Critical Hit is scored on an unmodified Hit roll of 5+ (instead of 6+). While this model is equipped with the Worldbreaker, it does not have the [FIGHTS FIRST] ability.

Core
[FIGHTS FIRST] [DEEP STRIKE]

Eternal Warrior
Each time damage is allocated to this model, if that damage exceeds 2, that damage is reduced to 2.

Master of War
At the start of each of your Command phases, if this model is on the battlefield, you gain 1 Command Point.

Sire of the Sons of Horus [AURA]
During Battle Round 1, each time a friendly Sons of Horus Infantry unit within 6" of this model is selected to make a Normal, Advance, or Charge move, add 1" to the Move characteristic of models in that unit for that move.

UNIT COMPOSITION

1 Horus Lupercal model. Equipped with: 1 The Warmaster's Talon (Ranged); 1 The Warmaster's Talon (Melee) or 1 Worldbreaker.

Designer's Note. Built directly from the real HH3e digitized "Horus Lupercal" profile (`Sons of Horus.json`). Real HH3e stat line: M8/WS8/BS6/S6/T6/W7/I6/A6/LD12/SAV2+/INV4+, 530pts (HH3e economy) — notably higher than every other cross-checked Primarch so far (Angron 450, Lion 460, Mortarion 425, Guilliman 465), and the real stat delta is specific: T6/LD12 match the others exactly, but W7 is one full wound higher than the W6 shared by

> Angron/Lion/Guilliman — direct confirmation that Horus really is the single toughest Primarch on the roster, not just fluff-text hype. Translated as W11 here (one step above the established W10 anchor) rather than a Toughness bump, matching where the real data actually shows the difference. Priced at 410pts by applying the real 530/450 ratio to Angron's 11e anchor of 350pts. Both weapons are real and canonically named: The Warmaster's Talon (a combined bolt-pistol-and-blade relic, real Breaching(6+)/Reaping Blow(3)/Shred(6+) in its melee profile, translated to Anti-vehicle 6+ ranged and Devastating Wounds + a scaled-up cleave-on-kill melee) and Worldbreaker (his signature thunder hammer, real Critical Hit(5+) — a better-than-default crit threshold — translated to Lethal Hits plus an explicit "5+ instead of 6+" clause, with the real IM-2 initiative penalty translated as losing Fights First while equipped). Eternal Warrior(2) and Master of War (a real, permanent "+1 Reaction Allotment" rule, i.e. the actual literal source of "Warmaster") are both real named rules, translated directly — Master of War replaces the standard once-per-battle Warlord CP ability entirely rather than stacking two CP-granting effects, since the real rule is explicitly recurring and already thematically is his Warlord ability. Sire of the Sons of Horus is real and two-part in the source: a Battle Round 1 Move buff for Infantry (built here) and an army-list "4+ Troops slots become Prime" bonus (an army-building mechanic without a clean single-card translation, left unbuilt). **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
