Designer's Note. Built directly from the real HH3e digitized "Hvarl Red-Blade" profile (`Space Wolves.json`), 210pts real cost — the highest real point cost of any non-Primarch character checked this session — translated using the standard ~0.76 named-character ratio to 160pts. Real stat line: M7/WS6/BS5/S4/T5/W5/I5/A5/LD10/CL9/WP9/IN9/SAV2+/INV4+, filed under the real High Command / Master of the Legion category (Space Wolves' equivalent of a Legion Praetor). Heavy bolter and Hearth-splitter (real Armourbane, translated to Anti-vehicle 3+) are both real and canonically named. Head-taker is a real Gambit, only usable in a Challenge, that denies the enemy an "Outside Support" bonus during the Focus Step — translated here as a Fights First ability specifically against enemy Characters, preserving the real rule's "duelist who denies his opponent any help" fantasy without requiring 11e's Challenge sub-system. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
