LEGIONES ASTARTES • DARK ANGELS • LOYALIST

Older oaths than the Legion itself bind this Cenobium together — knightly vows sworn on Caliban, carried into the Great Crusade, and kept with the same quiet certainty regardless of which century it happens to be.

Designer's Note. Built from the real HH3e digitized "Inner Circle Knights Cenobium" profile (`Dark Angels.json`) — a Terminator-tier formation of the Order's secretive Inner Circle, distinct from the Deathwing proper. Real stat line: Order Cenobite M6/WS5/BS4/S4/T5/W2/I4/A3/LD8, Order Preceptor (Sergeant) the same but WS6/LD9, both SAV2+/INV4+ — the same Terminator chassis used for the Deathwing Companions, translated identically. 270pts flat for 5 models (75pts unit base + 50pts/Cenobite), scaled proportionally from the Deathwing Cataphractii's real-to-11e ratio. Real weapons are the same Combi-Bolter and Calibanite Warblade seen on the Deathwing units — no unique named wargear on this profile. The real Order Exemplars rule (each Cenobium must select one of several "Orders of the Hekatonystika" at army-building time, e.g. the Order of the Broken Claws variant also present in the source data) is an army-list customization mechanic without a clean single-unit 11e translation — noted here as flavour rather than built as a mechanical option, to avoid inventing rules text the real data doesn't actually specify for each Order. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6

> like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
