> **Designer's Note.** Built directly from the real HH3e digitized "Invictus Suzerain Squad" profile (`Ultramarines.json`), an Elites choice, 30pts real per model, translated using the standard ~0.87 squad ratio to 26pts per model (130/260 for 5/10). Real stat line: M7/WS5/BS4/S4/T4/W2/I4/A3/LD9/CL9/WP8/IN8/SAV2+, real Argyrum pattern boarding shield (5+ invulnerable save, improving to 4+ against melee attacks — the melee value is used here as the card's single Invulnerable Save figure). The Legatine axe is real (real Breaching(4+), translated to Anti-vehicle 4+). Lords of Ultramar is real and is the squad's signature rule — nearby friendly units may use this unit's own Characteristics when recovering from a Tactical Status — translated here as a Leadership-sharing Battle-shock aura, preserving the real "a steady presence steadies everyone nearby" fantasy. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Intercessor Squad 80→85.
