## DOMITAR-FERRUM HONOUR GUARD

LEGIONES ASTARTES • IRON WARRIORS • TRAITOR

*Perturabo trusts these war machines the way he never quite learned to trust living Battle-Brothers — a Domitar-ferrum does not disappoint him, does not fail him, and does not ask him to be anything other than what he already is.*

### ABILITIES

**Graviton Crusher**
[ANTI-VEHICLE 4+]. Each time this weapon damages a unit, that unit is Battle-shocked.

**Core**
[DEADLY DEMISE D3]

**Implacable Advance**
This unit cannot be selected to make a Fall Back move, and ignores modifiers to its Movement characteristic.

**The Shield of the Iron Tyrant**
Each time a friendly Iron Warriors Character model is leading this unit, ranged attacks made against this unit cannot use the [PRECISION] ability to target that Character model.

### UNIT COMPOSITION

1-6 Domitar-ferrum models. Each model is equipped with a Graviton Crusher.

**Keywords:** VEHICLE, WALKER, AUTOMATA, IRON CIRCLE MANIPLE

**Faction Keywords:** LEGIONES ASTARTES, IRON WARRIORS

**Designer's Note.** Built from the real HH3e digitized "Iron Circle Maniple" profile (`Iron Warriors.json`) — Perturabo's personal Domitar-ferrum honour guard, the only unit besides the Primarch himself permitted aboard The Tormentor. Real stat line: M7/WS4/BS4/S7/T7/W4/I3/A3/LD8/SAV2+/INV5+, 15pts unit fee + 135pts/model (HH3e economy), 1-6 models — a genuinely flexible single-to-half-dozen unit size, unlike every other squad in this project's roster, which always has a real minimum of 5. Priced at 100pts/model. Graviton Crusher is the same real relic weapon carried by Perturabo and the Warsmith, translated identically. The Shield of the Iron Tyrant is a real, distinctively-named rule (protects an attached Iron Warriors Character, specifically Perturabo in the source text, from Precision attacks) — translated using the same Companions-pattern rendering already established for this project's other Precision-denial abilities, generalized to any attached Iron Warriors Character rather than gated to Perturabo alone, for consistency with how every other Legion's equivalent ability works. Firestorm and Impact(A) are real rules with no clean single-line translation and were not built separately. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
