> **Designer's Note.** Built directly from the real HH3e digitized "Jorlund Hunter Pack" profile (`Space Wolves.json`), 17pts real per model, translated using the standard ~0.87 squad ratio to 15pts per model (75/150 for 5/10). Real stat line: M7/WS4/BS4/S4/T4/W1/I4/A2/LD7/CL8/WP7/IN7. The Hand flamer uses this project's established Template-to-Torrent rendering, consistent with every other hand flamer built this session. Scouring Tempest is real — a mass-flamer squad rule that grants the unit's hand flamers the Panic(1) Special Rule once five or more are fired in the same Shooting Attack — translated here as a Battle-shock trigger on any unit caught by the massed flame, preserving the real "enough fire breaks nerve" fantasy since 11e has no direct Panic(X) equivalent. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Intercessor Squad 80→85.
