Every warrior in the Justaerin was chosen personally, and every one of them would tell you the same thing: it isn't an honour, it's a debt, and Horus expects it repaid in full.

> **Designer's Note.** Built from the real HH3e digitized "Justaerin Terminator Squad" profile (`Sons of Horus.json`) — the Warmaster's personal Terminator retinue, the Sons of Horus' answer to the Deathshroud/Huscarls seen on other Legions. Real stat line: M6/WS5/BS4/S4/T5/W2/I4/A4/LD10/SAV2+/INV4+, 25pts unit fee + 50pts/model (HH3e economy), 5-10 models. Priced at 240/475pts for 5/10. Banestrike Combi-Bolter and the Power Sword/paired Lightning Claws options are all real and canonically named (real Breaching(6+) on the combi-bolter, real Rending(6+)/Breaching(6+) on the claws, both translated to Anti-vehicle 6+, with Rending folded into Devastating Wounds per this project's standard translation). The real profile's full options list (a "1 in 5" heavy weapon swap, and a longer power-weapon list including chainfist/thunder hammer/power axe/power maul/power lance) was trimmed to the two most representative choices for card space, matching the same simplification already applied to Recon Squad and other generic units. Vanguard(4) is a real Victory-Point/deployment-scoring rule with no clean single-unit translation, left unbuilt. Slow and Purposeful is translated using this project's standard "shoot Heavy without penalty, but roll no charge dice" rendering. **11e codex update (18 Oct 2026):** toughness +1

> (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
