Designer's Note. Built from the real HH3e digitized "Kyzagan Assault Speeder" profile (`White Scars.json`) — a light Cavalry-type skimmer, real Type "Cavalry (Antigrav)". Real stat line: M14/WS4/BS4/S4/T7/W4/I4/A2/LD8/SAV3+ (no invuln), 105pts (HH3e economy), priced at 80pts using the same ~0.76 ratio applied to this project's other single-model named units (e.g. Rylanor the Unyielding). Weapon options are real and mutually exclusive: a single Kheres assault cannon, or a pair of Reaper autocannons — this card is statted and priced assuming the Kheres option, matching this project's standard "most representative option" convention for card space; the twin-Reaper-autocannon alternative would price and perform differently. Real Firing Protocols(3) is a Vehicle-only split-fire rule, translated directly as allowing this model to target up to 3 different units when shooting. Deep Strike is real and translated directly; Bulky(5) is untranslatable fluff and omitted. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Land Speeder 105→105.
