ABILITIES

Scornspitter
[CLOSE-QUARTERS] [ASSAULT] [ANTI-VEHICLE 6+]

The Axe of Helwinter
[ANTI-VEHICLE 3+]. Each time this model fights, if the enemy unit is greater in number than this model's unit, add 1 to this model's Attacks characteristic.

The Sword of Balenight
Each time an attack is made with this weapon, a Critical Hit is scored on an unmodified Hit roll of 5+ (instead of 6+).

Howl of the Death Wolf
Once per battle, at the start of the Fight phase, this model can be selected: for the rest of the phase, each time this model makes a melee attack, that attack automatically wounds, until the first time this model makes a melee attack that fails to wound, after which this ability has no further effect this phase.

Eternal Warrior
Each time damage is allocated to this model, if that damage exceeds 2, that damage is reduced to 2.

Sire of the Space Wolves [AURA]
During the first battle round, friendly Space Wolves Infantry units within 6" of this model can move across models and terrain features as if they were not there.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

> **Designer's Note.** Built directly from the real HH3e digitized "Leman Russ" profile (`Space Wolves.json`). Real stat line: M8/WS8/BS6/S7/T6/W6/I7/A7/LD12/CL10/WP10/IN10/SAV2+/INV4+, 450pts (HH3e economy) — a real cost exactly matching Angron's real 450pts, and like Angron, his real T6 sits in the standard baseline group rather than the elevated-Toughness group (Perturabo/Mortarion), so this card reuses Angron's own real-to-11e translation outright: 350pts, standard T9/W10, no bump. His real WS8 is the highest Weapon Skill of any Primarch checked so

far. All three weapons are real and canonically named: The Axe of Helwinter (real Armourbane, translated to Anti-vehicle 3+; real Reaping Blow(1), translated directly), The Sword of Balenight (real Critical Hit(5+), using the established "5+ instead of 6+" explicit rendering), and Scornspitter (his signature bolt pistol, real Breaching(6+), translated to Anti-vehicle 6+) — the real profile lists both melee weapons as separate mandatory-looking selections rather than one fixed loadout, rendered here as a genuine either/or choice between the Axe and the Sword, both paired with Scornspitter. Howl of the Death Wolf is a real, distinctively worded Gambit — a Challenge-only Focus Roll bonus of +5 that persists across the whole Challenge until he fails to wound — translated here as an auto-wound streak that breaks on the first failed Wound roll, preserving the real "unstoppable until the streak ends" fantasy without requiring 11e to track a stacking numeric bonus. Sire of the Space Wolves is real; its actual text is a Move-Through-Cover grant for Infantry Space Wolves models restricted to the first Battle Turn, plus an unbuildable army-building "Prime Slots" clause — the Move-Through-Cover portion is translated directly as a first-battle-round aura. Bulky(5) is untranslatable fluff and omitted; Eternal Warrior(2) is real and translated directly. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
