LION EL'JOHNSON

415
POINTS

PRIMARCH OF THE IST LEGION, THE DARK ANGELS

LEGIONES ASTARTES • DARK ANGELS • LOYALIST

He does not raise his voice. He has never needed to. The Lion measures every foe before the first blow lands, and by the time the duel ends, the measuring was the only part that mattered.

ABILITIES

The Fusil Actinaeus
[ASSAULT] [HAZARDOUS] [ANTI-VEHICLE 4+]

The Wolf Blade
[DEVASTATING WOUNDS] [ANTI-VEHICLE 4+]. Each time an attack made with this weapon destroys the model it targeted, if that model was part of a unit that has one or more models remaining, you can allocate 1 mortal wound to that unit.

Core
[FIGHTS FIRST]

The Lion's Choler
Each time this model makes a melee attack while it has 2 or fewer wounds remaining, a Critical Hit is scored on an unmodified Hit roll of 5+.

Sire of the Dark Angels [AURA]
While a friendly Dark Angels unit is within 6" of this model, you can re-roll Reserves arrival rolls made for that unit.

The Angels of Death
This model's Leadership characteristic can never be modified to be worse than 6+. Each time an ability would inflict a penalty on this model's Leadership characteristic, that penalty is capped at -1, regardless of the ability's own stated value.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

UNIT COMPOSITION

1 Lion El'Johnson model. Equipped with: 1 The Fusil Actinaeus; 1 The Lion Sword (or The Wolf Blade).

Designer's Note. Built directly from the real HH3e digitized "Lion El'Johnson" profile (`Dark Angels.json`), first pulled during Angron's cross-Primarch validation check and reused here as the actual build source. Real HH3e stat line: M8/WS8/BS6/S7/T6/W6/I7/A7/LD12/SAV2+/INV4+, 460pts (HH3e economy) — within the same tight band as Angron (450), Mortarion (425), and Roboute Guilliman (465), the fourth confirmation that these Primarchs all sit at the same "mortal Primarch" power tier. Priced at 355pts, scaling Angron's 350pts by the real 460/450 ratio —

> landing almost exactly on Guilliman's own 355pt anchor, which is a strong signal this whole cross-Primarch calibration approach is internally consistent. Both weapons are real and canonically named: The Lion Sword (his default blade — notably has no special rules at all in the source data, just a flat +2 Strength bonus, translated as a pure stat-stick with no keyword) and The Wolf Blade (an alternate relic option, real Shred(4+)/Breaching(4+)/Reaping Blow(2) translated to Devastating Wounds/Anti-vehicle 4+/cleave-on-kill) — giving a real choice between raw damage and rules-loaded utility, not an invented option. The Fusil Actinaeus (his relic plasma carbine) is also real. The Lion's Choler (real Gambit: a Focus Roll bonus specifically when badly wounded in a Challenge) and The Angels of Death (real mental-resilience rule, caps Leadership/Fear penalties) are both translated directly — the latter is a genuinely new mechanic for this project, distinct from any other Primarch's kit, matching Lion's icy, unbreakable-composure characterization. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
