'LITTLE' HORUS AXIMAND

145 POINTS

CAPTAIN, FIRST COMPANY

LEGIONES ASTARTES • SONS OF HORUS • TRAITOR

They called him "Little" Horus for the resemblance, half in jest, half in genuine reverence — and Aximand carries the name the way he carries everything else the Warmaster gives him: without complaint, and without ever quite putting it down.

Designer's Note. Built directly from the real HH3e digitized "'Little' Horus Aximand" profile (`Sons of Horus.json`). Real stat line: M7/WS6/BS5/S4/T4/W4/I5/A5/LD10/SAV2+/INV4+, 170pts (HH3e economy) — the same "Command" HQ chassis shared across Loken, Tybalt Marr, and Vheren Ashurhaddon in the source data, translated to 130pts using this Legion's ~0.76 ratio. Mourn-it-all is his real, canonically-named signature blade (real Critical Hit(6+), translated to Lethal Hits). The real "Haunted" rule (bonus Victory Points if Aximand personally kills Garviel Loken in a Challenge) is a mission-scoring mechanic tied to a specific named-character matchup rather than a portable combat ability — left unbuilt rather than generalized into something the source data doesn't actually say, consistent with this project's handling of other VP-only real rules. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
