HOMEBREW — HH-ERA (30K)

MAGISTUS AMON

150 POINTS

MAGISTER TEMPLI OF THE ATHANAEAN

LEGIONES ASTARTES • THOUSAND SONS • TRAITOR

The Athanaean keep the Legion's memory — every rite, every rune, every name of the dead — and Amon guards that archive the way another Legion might guard a Primarch.

Designer's Note. Built directly from the real HH3e digitized "Magistus Amon" profile (`Thousand Sons.json`). Real stat line: M7/WS6/BS5/S4/T4/W4/I5/A5/LD10/SAV2+/INV4+, 185pts (HH3e economy), translated to 140pts (same ratio and same real cost as Ahriman). The Reliquary of Dust is real and canonically named, a genuinely unusual combined weapon: a ranged mode (real R12/2D6 shots/AP6/Poisoned(5+)/Breaching(5+)/Stun(3)/Limited(1), fired once per battle per the real Limited(1) rule) and a melee mode (real Poisoned(2+)) sharing one name — translated as two separate weapon profiles on the same card, the ranged one keeping the real once-per-battle limit rather than smoothing it into an always-available gun. Magister of Dust (real: grants Telepathy and Divination Psychic Disciplines) is translated directly as a flavour-only ability line, matching how Ahriman's own scoped Arcana was partially translated. Infiltrate(9) is real and translated to the core [INFILTRATORS] ability. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Librarian 70→75.
