HOMEBREW — HH-ERA (30K) — DARK ANGELS ONLY

MARDUK SEDRAS

190 POINTS

INTERROGATOR-CHAPLAIN

LEGIONES ASTARTES • DARK ANGELS • LOYALIST

He does not preach. He interrogates — the fallen, the failing, and most of all himself — and the weapon he carries was built for exactly that kind of question.

ABILITIES

Phosphex Bombs
[BLAST] [ANTI-VEHICLE 5+]. Each time this weapon is used to make an attack, an unmodified Wound roll of 3+ always scores a wound, regardless of the target's Toughness characteristic. Each time this weapon inflicts any damage on an enemy unit, subtract 2 from that unit's Leadership characteristic until the end of the battle round.

Core
[FIGHTS FIRST]

Implacable Advance
This model cannot be selected to make a Fall Back move, and ignores modifiers to its Movement characteristic.

Ancient of War
While this model is leading a unit composed entirely of Dark Angels models, each time a model in that unit makes an attack that targets a unit with the Chaos keyword, you can re-roll the Hit roll and the Wound roll.

The Angels of Death
This model's Leadership characteristic can never be modified to be worse than 6+. Each time an ability would inflict a penalty on this model's Leadership characteristic, that penalty is capped at -1, regardless of the ability's own stated value.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

UNIT COMPOSITION

DESIGNER'S NOTE. Built from the real HH3e digitized "Marduk Sedras" profile (`Dark Angels.json`, filed as High Command) — an Interrogator-Chaplain from the Ruinstorm/Angels of Caliban material. Real stat line: M6/WS6/BS5/S4/T5/W5/I5/A5/LD10/SAV2+/INV4+, 225pts (HH3e economy) — notably tougher (T5/W5) than Corswain's real T4/W4 despite similar cost, translated here as T5/W6 in 11e. Priced at 170pts, just above Corswain's 165. The Death of Worlds (his signature weapon — real SM+5, an enormous flat Strength bonus with no special rules at all, translated as a pure heavy-hitting stat-stick matching Lion's own default sword design) and Phosphex Bombs (his signature ranged weapon, real Blast(3")/Poisoned(3+)/Panic(3)/Breaching(5+)) are both real and resolved from the shared Weapons.json library. Ancient of War is a real named rule (grants Hatred vs. Traitors

> to an all-Dark-Angels unit he leads), translated as a Hit/Wound re-roll specifically vs. Chaos-keyword targets. The Angels of Death is the same real Legion-wide rule shared with Lion El'Johnson and Corswain. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Captain 80→90.
