MHARA GAL DREADNOUGHT

160 POINTS

THE BOUND FURY

LEGIONES ASTARTES • WORD BEARERS • TRAITOR

Whatever was bound into that sarcophagus is not entirely the Legionary it started as, and it has not been quiet about that fact since.

Designer's Note. Built from the real HH3e digitized "Mhara Gal Dreadnought" profile (`Word Bearers.json`) — a unique, named daemon-bound Dreadnought, real Type "Walker (Malefic)". Real stat line: M8/WS5/BS4/S7/T7/W7/I4/A4/LD12/CL10/WP8/IN5/SAV2+/INV5+, 210pts (HH3e economy) — a real W7 that's a full point above Rylanor the Unyielding's own real W6, reflecting a genuinely tougher chassis. Priced at 160pts using the same ~0.76 character ratio applied to this project's other single-model named units. Both weapons are real and canonically named: Burning Warpfire (real Breaching(4+)/Shred(6+)/Panic(2), translated using this project's standard Template-to-Torrent rendering, Devastating Wounds, and Anti-vehicle 4+ respectively) and Tainted Claw (real SM+3/D3, translated as a heavy Devastating-Wounds claw in line with this project's other Dreadnought-tier melee weapons). Explodes(5+) is real, translated to Deadly Demise D3; Fear(1) and Implacable Advance are both real and translated directly. The real weapon-exchange options (Gravis bolt cannon, Gravis melta cannon, Gravis autocannon, twin lascannon, Warpfire Cannon) were trimmed for card space to the default Burning Warpfire/Tainted Claw loadout, matching this project's standard simplification of secondary weapon lists. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-

QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
