PRIMARCH OF THE XIVTH LEGION, THE DEATH GUARD

LEGIONES ASTARTES • DEATH GUARD • TRAITOR

He hated the warp before he ever knew what it truly was, and he hates it still — even as it curls around him like an old friend he never asked to keep. Silence has not left his hand since Barbarus.

ABILITIES

The Lantern
[ASSAULT] [ANTI-VEHICLE 3+]

Silence
[LETHAL HITS]. Each time an attack made with this weapon destroys the model it targeted, if that model was part of a unit that has one or more models remaining, you can allocate D3 mortal wounds to that unit.

Core
[FIGHTS FIRST]

Shadow of the Reaper
This model has the Infiltrate ability. Each time this model is selected to Advance, treat the Advance roll as a 6.

Preternatural Resilience
Each time an attack that has the [DEVASTATING WOUNDS] ability targets this model, that ability only triggers on an unmodified Wound roll of 6, regardless of any rule that would lower that requirement.

Death Cloud
At the start of the Fight phase, each enemy unit within Engagement Range of this model suffers 1 mortal wound.

Sire of the Death Guard [AURA]
During Battle Round 1, each time a friendly Death Guard Infantry unit within 6" of this model is selected to shoot, add 1 to the Hit roll.

Fear
Each time an enemy unit within 6" of this model takes a Battle-shock test, that test is taken with a -1 modifier.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

> **Designer's Note.** Built directly from the real HH3e digitized "Mortarion" profile (`Death Guard.json`) rather than hand-calibrated against a 40K analog — the BSData gap that forced hand-calibration for Angron's first draft has already been fixed. Real HH3e stat line: M8/WS7/BS6/S7/T7/W7/I6/A6/LD12/SAV2+/INV4+, 425pts in HH3e's own economy — within the same tight band as Angron (450), Lion El'Johnson (460), and Roboute Guilliman (465),

confirming these five Primarchs all sit at the same "mortal Primarch" power tier despite individual stat variance. Mortarion's real T7/W7 (both +1 over Angron's real T6/W6) is preserved as a genuine point of difference: T10/W11 in 11e, one step tougher than Angron's T9/W10. Priced at 330pts, scaling Angron's 350pts by the real 425/450 ratio between the two Primarchs. Both weapons are real and canonically named: The Lantern (his relic sidearm, real Armourbane trait translated to Anti-vehicle 3+) and Silence (his signature scythe, real Reaping Blow(3) translated to a cleave-onto-the-unit mortal wound effect, scaled up from Angron Transfigured's Reaping Blow(2) translation to reflect the higher real value). Shadow of the Reaper, Preternatural Resilience, Death Cloud, and Sire of the Death Guard are all real named HH3e rules, translated into 11e idiom rather than invented: Preternatural Resilience in particular is a genuinely new mechanic for this project (a defensive cap on incoming Devastating Wounds triggers), matching its real text (limits the Critical Hit threshold of incoming attacks against him to 6+) more faithfully than a generic damage-reduction stat. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
