Designer's Note. Built directly from the real HH3e digitized "Nemesis Destroyer Squad" profile (`Ultramarines.json`), a Heavy Assault choice, 30pts real per model, translated using the standard ~0.87 squad ratio to 26pts per model (130/260 for 5/10). Real stat line: M7/WS4/BS4/S4/T4/W1/I4/A1/LD8/CL7/WP7/IN7/SAV3+, no invulnerable save — a real Destroyer-tier squad, matching the archetype's canonical role as expendable specialists issued the Legion's harsher munitions. The Mortifier bolter is real and this squad's signature weapon (real Panic(1), translated to a Battle-shock trigger, preserving the real "every hit chips at their nerve" fantasy). **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Assault Intercessor Squad 75→85.
