Designer's Note. Built from the real HH3e digitized "Night Raptor Squad" profile (`Night Lords.json`) — the Legion's own jump-infantry line unit, typed "Infantry (Antigrav)" in the source and carrying the same M12 as this project's other Legions' assault-pattern squads. Real stat line: Huntmaster (Sergeant) M12/WS5/BS4/S4/T4/W2/I4/A3/LD8/SAV3+ (no invuln), Night Raptor the same but LD8/no Sergeant bonus, both 25pts/model plus a 50pts unit fee (HH3e economy), 5-15 models. Priced at 130/250pts for 5/10, in line with this project's ~0.85-0.90 squad ratio. Pair of Lightning Claws is real (10pts/model, real profile shared with other Legions' claw options, translated to Devastating Wounds matching this project's standard claw rendering). The real profile's full options list (a 1-in-5 special weapon swap covering flamer/meltagun/plasma gun/plasma pistol/volkite serpenta, and a chainblade/chainglaive exchange for the Huntmaster) was trimmed for card space to the claws upgrade, matching the simplification already applied to other generic Legion squads. Impact(I) is a real charge-bonus rule, translated using this project's standard Rampager Squad rendering (a flat Strength bonus on the charge turn rather than scaling off Initiative); Vanguard(4) is a real Victory-Point/deployment-scoring rule with no clean single-unit translation and is left unbuilt. **11e codex update (18 Oct 2026):** power armour T5 like the codex

> Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Vanguard Veteran Squad with Jump Packs 105→110.
