Designer's Note. Built from the real HH3e digitized "Palatine Blade Aquilae Squad" profile — a jump-pack-equipped variant of the standard Palatine Blade Squad, real Type "Infantry (Antigrav)" on both its Prefector and Warrior entries. Real stat line: identical WS5/BS4/S4/T4/W2/I4/A3/LD8/SAV2+ (no invuln) to the foot-slogging Palatine Blade Squad, but M12 instead of M7, and 33pts/model plus a 63pts unit fee (HH3e economy) instead of 28/53 — priced at 170/315pts for 5/10, using this project's ~0.87 squad ratio applied to the higher real cost. Weapon and Duellist's Edge rendering are identical to the base Palatine Blade Squad's own card, since the real profiles share the same default loadout and options list; the real profile's alternate weapon options (Phoenix power spear, Phoenix rapier, Power Weapon list) were trimmed for card space, matching the base squad's own simplification. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Vanguard Veteran Squad with Jump Packs 105→110.
