HOMEBREW — HH-ERA (30K)

PERTURABO

385 POINTS

PRIMARCH OF THE IVTH LEGION, THE IRON WARRIORS — THE LORD OF IRON

LEGIONES ASTARTES • IRON WARRIORS • TRAITOR

He built the Emperor's siege engines and got none of the glory for it — every wall he's ever taken down, he took down because no one gave him a better way to be noticed.

ABILITIES

The Logos Array (Ranged)
[ASSAULT] [DEVASTATING WOUNDS]. Each time this weapon's attacks destroy one or more models, subtract 1 from the Objective Control characteristic of the target unit until the end of the turn.

The Logos Array (Melee)
[DEVASTATING WOUNDS]

Forgebreaker Desecrated
[LETHAL HITS]. Each time an attack is made with this weapon, a Critical Hit is scored on an unmodified Hit roll of 5+ (instead of 6+).

Core
[FIGHTS FIRST]

Battlesmith
At the end of your Command phase, each friendly Vehicle model within 3" of this model regains up to 3 lost wounds.

Eternal Warrior
Each time damage is allocated to this model, if that damage exceeds 2, that damage is reduced to 2.

The Breaker
Once per battle, at the start of the Fight phase, instead of being selected to fight, you can select one other friendly Iron Warriors unit within 12" of this model that is not within Engagement Range of any enemy unit. That unit can shoot this phase as if it were your Shooting phase, but must target the enemy unit this model is currently within Engagement Range of.

Sire of the Iron Warriors [AURA]
During Battle Round 1, friendly Iron Warriors Infantry units automatically pass Battle-shock tests.

Warlord
If this model is your Warlord, once per battle, in your Command phase, you can gain 1 Command Point.

UNIT COMPOSITION

1 Perturabo model. Equipped with: 1 The Logos Array (Ranged); 1 The Logos Array (Melee) or 1 Forgebreaker Desecrated.

> **Designer's Note.** Built directly from the real HH3e digitized "Perturabo" profile (`Iron Warriors.json`). Real stat line: M7/WS7/BS7/S6/T7/W6/I5/A6/LD12/CL10/WP10/IN10/SAV2+/INV4+, 425pts (HH3e economy) — real T7 is one step above the Angron/Lion/Magnus/Guilliman baseline (matching only Mortarion's own real T7), and his real BS7 is the highest Ballistic Skill of any Primarch cross-checked so far, reflecting his engineer's precision as much as his martial skill. Real cost (425pts) exactly matches Mortarion's, so this card reuses Mortarion's own real-to-11e translation outright: 330pts, with the same T9→T10 bump (his real W6 matches the un-elevated baseline, so W stayed at 10 rather than following Mortarion's W11). Both weapons are real and canonically named: The Logos Array (a combined relic gun-and-hammer, real Shred(4+)/Suppressive(1) in its ranged profile, translated to Devastating Wounds plus an Objective-Control-reduction effect for the Suppressive rule) and Forgebreaker Desecrated (a corrupted, Chaos-touched version of his real signature thunder hammer Forgebreaker, real Critical Hit(5+), translated the same way as Horus's Worldbreaker). Battlesmith(3) and Eternal Warrior(2) are both real, translated directly — Battlesmith as a Vehicle-repair aura, matching his real fluff as the Legion's own master artificer. The Breaker is a real, genuinely distinctive Gambit: forgo his own Challenge attack so a nearby unit can make a bonus Shooting Attack against his opponent instead — translated faithfully as a combined-arms Fight-phase trade-off rather than smoothed into a generic buff. Sire of the Iron Warriors is real and structurally mirrors every other Primarch's own Sire ability; its real "Expendable(1)" grant (an attrition/morale-adjacent rule) was translated as automatic Battle-shock passes for Battle Round 1, matching the Legion's real "these troops are built to be spent" characterization. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
