PHRAETUS ANOINTED CONCLAVE

250 / 450
2 / 5 MODELS

BOUND AND BLESSED TERMINATORS

LEGIONES ASTARTES • WORD BEARERS • TRAITOR

Whatever rites were performed to seal them into that plate did not entirely go as planned, and the Legion has decided it prefers the result.

Designer's Note. Built from the real HH3e digitized "Phraetus Anointed Conclave" profile (`Word Bearers.json`) — a heavy-armour daemon-bound Terminator-tier squad, real Type "Infantry (Heavy, Malefic)". Real stat line: Phraetus Anointed M5/WS5/BS4/S4/T6/W3/I3/A3/LD8/SAV2+/INV4+, 65pts/model plus a 110pts unit fee (HH3e economy), 2-5 models. Priced at 210/380pts for 2/5, using this project's established ~0.87 squad ratio, and — like the White Scars' Golden Keshig — a genuinely unusual squad-size range rather than the usual 5/10 pattern. Paired Saturnine Disruption Fists is real and canonically named (real IM-2/AM+1/SM+2/AP2/D3, no Special Rules listed in the source — kept exactly that way, a plain but very heavy-hitting weapon, rather than inventing extra abilities for it). Deadly Demise D3 (from real Explodes(5+)) and Implacable Advance are both real and translated directly. The real profile's separate "Phraetus Disciple" trooper entry (a cheaper, non-Terminator-tier squad member) and the full weapon-exchange list (Plasma bombard, Twin heavy disintegrator, Saturnine war axe, Particle Shredder) were trimmed for card space to the Anointed-only build with its default weapon, matching this project's standard simplification of the most complex generic squads. **11e codex update (18 Oct 2026):** toughness +1 (Terminator armour T6, bikes T6 like codex Outriders); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Terminator Squad 160→190.
