Designer's Note. Built directly from the real HH3e digitized "Praetorian Breacher Squad" profile (`Ultramarines.json`), the Ultramarines' Troops choice, 43pts real per model, translated using the standard ~0.87 squad ratio to 37pts per model (185/370 for 5/10). Real stat line: M7/WS4/BS4/S4/T4/W2/I4/A2(Praetorian)/A3(Primus)/LD8/CL8/WP7/IN7/SAV3+/INV5+ — real W2 makes this a tougher-than-usual Troops choice, matching the real Breacher archetype's real close-quarters-siege durability. No standalone real Special Rule beyond wargear was found attached to this profile in the source data, so the card is presented plainly with the squad's real combat-shield-and-bolter loadout. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Assault Intercessor Squad 75→85.
