Designer's Note. Built from the real HH3e digitized "Reaver Aggressor Squad" profile (`Sons of Horus.json`) — a jump-pack-equipped sibling unit to the Reaver Attack Squad, the Sons of Horus' Assault Squad equivalent. Real stat line is identical to the Reaver Attack Squad except Type "Infantry (Antigrav)" and M12 (vs M7) — a real Movement-only delta, translated directly, with no stat changes elsewhere. Real Deep Strike (present here, absent on the ground-based Reaver Attack Squad) is also translated directly. Priced at 105/205pts for 5/10, a modest premium over the ground-based Reaver Attack Squad's 85/165pts for the added mobility, in line with other Legions' jump-pack-squad pricing. Precision(6+) and Vanguard(3) are both real; Precision translates directly to the core [PRECISION] ability, Vanguard is a real Victory-Point/deployment-scoring rule left unbuilt, same as its Reaver Attack Squad sibling. **11e codex update (18 Oct 2026):** power armour T5 like the codex Intercessors and the Chaos Legionaries; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Vanguard Veteran Squad with Jump Packs 105→110.
