Designer's Note. Built directly from the real HH3e digitized "Roboute Guilliman" profile (`Ultramarines.json`). Real stat line: M8/WS7/BS6/S6/T6/W6/I6/A6/LD12/CL10/WP10/IN10/SAV2+/INV4+, 465pts (HH3e economy) — his real T6 sits in the standard baseline Primarch group, so this card uses the standard ~0.775 translation ratio: 360pts, standard T9/W10, no bump. All three real weapons are canonically named and genuinely equippable together: The Arbitrator (his signature bolt pistol, real Breaching(5+), translated to Anti-vehicle 5+) is fixed, paired with a choice between The Gladius Incandor (real Duellist's Edge(1), the standard conditional Fights-First-vs-Characters rendering) or The Hand of Dominion (his real power fist, real Armourbane, translated to Anti-vehicle 3+, the highest real Damage of any Primarch melee weapon checked this session). Calculating Swordsman is a real, distinctively

worded Gambit — his Focus Roll bonus in a Challenge scales with the current Battle Turn number, capped at +4, reflecting a mind that reads a battle better the longer it runs — translated as a once-per-battle Attacks bonus scaling with the battle round, same cap. Sire of the Ultramarines is real; its actual text is a Force-Organisation Prime-Slots clause (unbuildable in 11e, omitted) plus a genuine first-Battle-Turn objective-control guarantee for Infantry Ultramarines even under a Tactical Status, translated directly as a first-battle-round aura. **11e codex update (18 Oct 2026):** Primarch toughness +1 and wounds ×1.6 (as GW did for Guilliman and the Lion, T9 W10 → T10 W16); Astartes bolt weapons S5 AP-1 (pistols [CLOSE-QUARTERS]) and codex-named weapons on the codex profile; points scaled with Roboute Guilliman 355→415.
