HOMEBREW — HH-ERA (30K) — LOYALIST

RYLANOR THE UNYIELDING

135 POINTS

THE LAST GUARDIAN OF ISSTVAN III

IMPERIAL FISTS • LOYALIST

He held the ash-choked ruins alone for three days against a Legion that no longer wanted him dead so much as it wanted him to stop reminding them what they used to be.

Designer's Note. Built from the real HH3e digitized "Rylanor" profile — filed inside `Emperor's Children.json` rather than an Imperial Fists file, since his defining lore moment (a lone Contemptor holding the ash-fields of Isstvan III against the traitor Legions in the wake of the Drop Site Massacre) is inseparable from this Legion's own dark history. Real stat line: M8/WS4/BS4/S7/T7/W6/I4/A4/LD12/CL12/WP7/IN5/SAV2+/INV5+ (Smokescreen), 180pts (HH3e economy), Type "Walker (Unique)". Priced at 135pts using the same ~0.76 character ratio applied elsewhere in this project, despite being a Vehicle rather than Infantry — his real cost and stat scale sit closer to a named HQ character than a generic Dreadnought squadron entry. All three weapons (Kheres assault cannon, Gravis power fist, Heavy flamer) are real and match this project's standard Contemptor-pattern loadout and stat rendering. Explodes(5+) is real, translated to Deadly Demise D3; Implacable Advance is real and translated directly. Real "Vengeful Hate" (Rylanor must be the Challenged model whenever a Fulgrim or Fulgrim Transfigured model declares him as its Challenger) is a genuine, pointed piece of fluff — kept as flavour text in this card's description rather than built as a hard game restriction, since 11e has no Challenge sub-system to enforce it in. **11e codex update (18 Oct 2026):** statline unchanged; Astartes bolt weapons S5 AP-1 (pistols [CLOSE-

> QUARTERS]) and codex-named weapons on the codex profile; points scaled with Dreadnought [Legends] 135→135.
